Event Budget & Expense Analysis

Project Overview

This independent portfolio project uses fictional event expense data to demonstrate spreadsheet reporting and budget analysis skills in Google Sheets.

Business Question

How does actual event spending compare with planned budgets, and which expense categories or events need attention?

Skills Demonstrated

Spreadsheet formulas and calculations

IF and COUNTIF functions

Pivot tables and data summarization

Charts and dashboard design

Conditional formatting

Budget variance analysis

Key Findings

Total planned budget: $29,500

Total actual spending: $29,900

Overall spending exceeded budget by $400.

Seven individual expense lines exceeded their budgets.

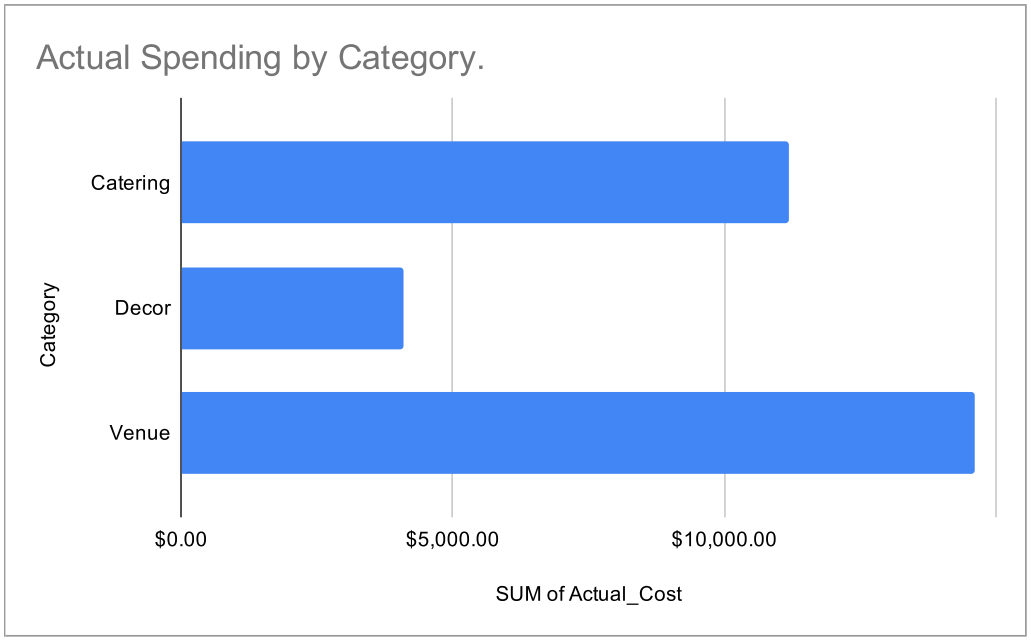

Recommendation

Review the over-budget expense lines to identify the causes of overspending. Use the event and category summaries to prioritize follow-up with vendors and improve future estimates.

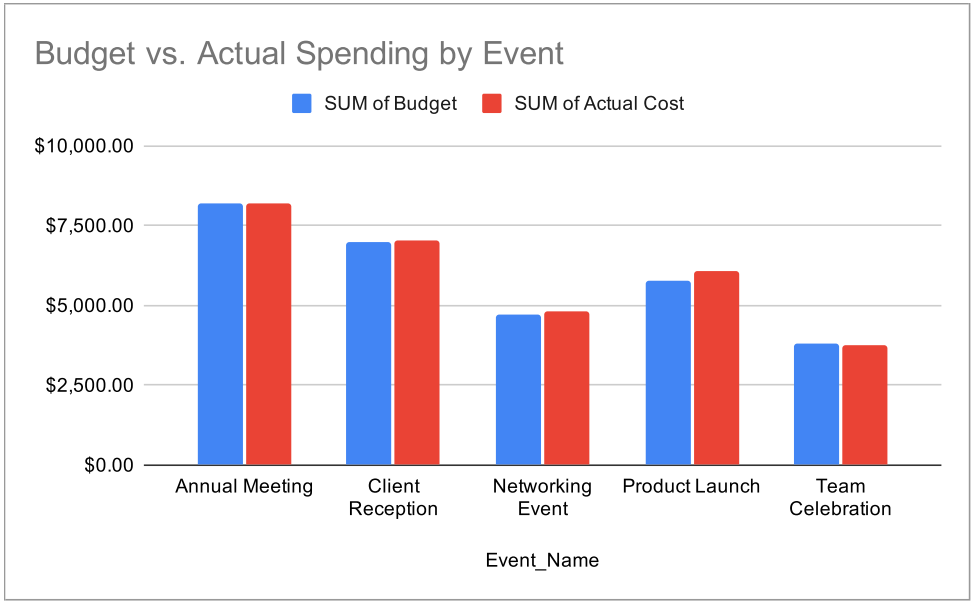

All data in this project is fictional and created for portfolio practice.

Event_ID	Event_Name	Category	Vendor	Budget	Actual_Cost	Variance	Budget_Status
EVT001	Product Launch	Catering	Sample Catering Co	$2,000.00	$2,350.00	$350.00	Over Budget
